Investment Strategy

The Pool is a multi-cap fund that seeks to provide investors with long-term outperformance by emphasizing exposures to value, quality and momentum factors. Consequently, the Pool diversifies Canadian core market and dividend strategies.

The Pool is designed to capitalize on the breadth of the entire Canadian market. It also incorporates dynamic investment tax management.

Securities are selected based on an assessment of the investible universe using a rules-based, multi-factor investment approach that considers value, quality, momentum, and other characteristics that academic research has associated with higher expected returns.

The Manager employs sectoral exposure limits to manage risk. The maximum exposure permitted to any single issuer is 10% of the Net Asset Value of the Pool. The Manager may short securities up to 20% of the Pool's Net Asset Value and may employ leverage up to 10% of the Net Asset Value.

Manager Overview

The Pool is offered through TCI Premia Portfolio Solutions, managed by Tacita Capital, a portfolio management firm and Family Office focused on advanced portfolio construction for affluent Canadians.

TCI Premia Portfolio Solutions are specifically designed to enhance diversification in traditionally designed portfolios and to provide advisors with solutions that offer the opportunity for enhanced investment tax management.

Tacita Capital Inc. employs an evidenced-based investment philosophy and process that incorporates the research findings of many of the world's leading financial academics and sophisticated investment practitioners.

Calculation Method

Investment returns reflect the reinvestment of dividend and capital gain distributions. Returns generated prior to March 9, 2018 are Separately Managed Account returns not Pool returns. Returns after March 8, 2018 are Pool returns. Simulated Series F returns are based on applying Series F management and performance fees to Series M (no fee) and Separately Managed Account (no fee) performance. Estimated Pool expenses were also deducted from the Separately Managed Account (no fee) performance.

DISCLAIMER

This document is a summary of certain attributes of the Fund and is not an offer or solicitation for the purchase or sale of securities. The information contained in this document is not intended to be, nor should it be considered as, a complete description of either the securities described herein or the issuer of the securities. For additional details regarding the terms and conditions of the securities, please refer to the Master Declaration of Trust, Offering Memorandum and the Subscription Agreement relating to the purchase of Units of the Pool. Under no circumstances should this document be construed as an offering memorandum. No securities commission or similar authority in Canada or the United States has in any way passed judgement upon the merits of the securities described herein nor has it reviewed this document, and any representation to the contrary is an offence. The offering of shares of the Pool is made pursuant to the Offering Memorandum only to those investors in specific jurisdictions where such offering is legally allowed. While every effort has been made to provide accurate data, no warranty is made with respect to, and no reliance should be placed on, the fairness, accuracy, completeness or timeliness of the information contained herein. For detailed disclosure of the risks and statutory rights associated with an investment in the TCI Premia Private Pools, see the Risk Factors and Rights of Action for Damages or Rescission sections of the Offering Memorandum. Investment returns reflect the reinvestment of dividend and capital gain distributions. Past performance is not indicative of future returns. Performance returns of the series an investor is invested in may vary from the reported performance numbers. Distribution yield is the annual yield an investor would receive if the most recent fund distribution stayed the same going forward. The yield represents a single distribution from the fund and does not represent the total return of the fund. The yield is calculated by annualizing the most recent distribution and dividing by the fund NAV. The yield is net of management fees and other fund expenses. All dollar figures are represented in CAD unless otherwise noted. Tacita Capital reserves the right to negotiate alternate fee structures.
